INTRODUCTION

Le présent document contient tous les ensembles et pièces détachées et vendables en rechange; il permet de déterminer avec précision leurs numéros et de les identifier facilement par les illustrations.

Ces ensembles et ces pièces sont répartis par **planche** suivant l'organe ou l'élément d'organe auquel ils se rattachent.

Chaque **planche** est identifiée par un numéro à 4 chiffres dont les deux premiers correspondent à un code organe déterminé; elle peut être caractérisée par une variante ou un point de départ dans le cas où elle s'identifie avec une planche similaire.

Une planche se compose:

de l'illustration des pièces et ensembles contenus dans la planche et qui diffèrent de forme; à chaque pièce illustrée correspond un ou plusieurs numéros de pièces caractérisés entre eux par une variante ou un signe codifié.

et, éventuellement, de **tableaux** comportant des renseignements complémentaires tels que points de départ et consignes. Ces tableaux figurent soit en bas de l'illustration, soit sur une page annexe à l'illustration.

Remarque: la signification des signes et expressions codifiés utilisés dans chaque planche, est indiquée dans la planche n° 05.00.

Un **répertoire numérique** en fin de catalogue donne la correspondance entre les numéros de pièces et les numéros de planches ainsi que les quantités de pièces par véhicule dans la planche considérée, sauf pour les numéros de boulonnerie normalisée. Le document P. R. 830 donne la signification des numéros codifiés de la boulonnerie normalisée.

UTILISATION

Détermination du numéro d'une pièce connaissant la nature de celle-ci:

1. Rechercher dans le **répertoire des planches** la planche correspondant à l'organe ou l'élément d'organe auquel cette pièce peut se rattacher.
2. Compulser le catalogue pour y retrouver cette planche en tenant compte éventuellement, du point de départ ou de la variante caractérisant la planche.
3. La planche étant déterminée, rechercher l'illustration de la pièce désirée.

A cette illustration correspond un ou plusieurs numéros. Choisir celui qui convient, compte tenu des signes ou expressions codifiés les caractérisant.

Les renvois numériques ou alphabétiques affectés aux numéros de pièces, assurent la liaison entre ces numéros et les renseignements complémentaires s'y rapportant, contenus dans les tableaux situés soit en bas de l'illustration soit en page annexe.

Vérification, par les Succursales Concessionnaires ou Centres Importateurs, d'un bon de commande, rédigé par un Agent ou un client ayant utilisé la documentation en sa possession.

1. Rechercher dans le **répertoire numérique**, au numéro de pièce donné par le bon de commande, les numéros de planches correspondantes.

2. Consulter ces planches pour vérifier si le numéro de pièce est bien celui qui convient compte tenu des points de départ affectés à ce numéro et du numéro de véhicule ou d'organe pour lequel la pièce est commandée.

Identification par l'illustration d'une pièce dont on connaît le numéro.

1. Rechercher dans le répertoire numérique, au numéro de pièce donné, le numéro des planches correspondantes.
2. Consulter ces planches.

INTRODUCTION

This document contains all the assemblies and parts sold as spares; it enables one to determine with precision their numbers and to identify them easily by the illustrations.

These assemblies and these parts are set out in illustrated plates according to the unit or sub-assembly to which they belong. Each plate is identified by a four figure number, the first two of which correspond to a specified unit code; it may be distinguished by a variant or a starting point in the case where it is identifiable with a similar plate.

A plate consists of:

the illustration of parts and assemblies contained in the plate and which differ in shape; to each part shown corresponds one or several part numbers distinguished one from the other by a variant or a code sign.

and when necessary, tables showing additional information such as starting point, and instructions. These tables figure either at the bottom of the illustration or on a page added to the illustration.

Note: The meaning of the code signs and expressions used on each plate, is indicated on plate n° 05.00

A **numerical index** at the end of the catalogue gives the relationship between the part numbers and the plate numbers, also the quantity of parts per vehicle in the plate under consideration, except for the numbers of standard nuts and bolts. Document P. R. 830 gives the meaning of the code numbers of standard nuts and bolts.

USE

Ascertaining a part Number knowing the nature of this part:

1. In the **plate index**, find the plate corresponding to the unit or sub-assembly to which this part may be attached.
2. Consult the catalogue to find this plate, when necessary taking into account the starting point or the variant distinguishing this plate.
3. Having found the plate, look for the illustration of the desired part. One or several numbers correspond to this illustration; choose the suitable number, taking into account code signs or expressions which distinguish them.

The numerical or alphabetical reference marks added to the part number, ensure the connection between these numbers and the additional information appertaining to them, included in the tables found at the bottom of the illustration or on the additional page.

Checking by Branches, Distributors or Importation Centres of an **Order Form** which has been filled in by an Agent or by a client using the documents in his possession.

1. In the **numerical index**, at the part number indicated on the order form, find the corresponding plate numbers.
2. Examine these plates to check that the part number given is correct taking into account the starting points added to this number and the number of the vehicle or unit for which the part has been ordered.

Identifying by the illustration a part the number of which is known.

1. In the numerical index, at the given part number find the corresponding plate numbers.
2. Consult these plates.
